

 RELEASE NOTES

Altair Activate 2021.0.1

Business Edition *

Personal Edition

Resolved Issues

Altair Activate 2021.0.1 is mainly a bug fix release featuring a variety of resolved issues.

User Interface

Zoom Bar

The issue of crashing when working in split windows and using the Fit tools and Fit buttons that are in the Zoom Bar is resolved.

Simulation

Spice Circuit*

- The issue with simulating some HyperSpice models with digital input is resolved.
- The issue with importing Spice libraries is resolved.

Co-Simulation*

The issue of loading .mdl files for co-simulation in MotionSolve, observed in some HyperWorks configurations, is resolved.

OML Language

Slider Performance

The slider (GUI command) performance that was reduced in Activate 2021 has been restored.

GUI Command

The issue with setting the value of a GUI element is fixed.

Library Manager

The issue with crashing when using the **Install** option in the Library Manager with OMC files is fixed.

** Applies to Business Edition only.*
