

 RELEASE NOTES

Altair Inspire™ Studio 2021.1.1

New Features and Enhancements 2021.1.1

Altair Inspire Studio 2021.1.1 includes the following new features and enhancements.

- The View Cube has replaced the NaviCube to match other HyperWorks applications.

- Various bug fixes

Die Design

New Enhancements

- The **Addendum Loft** tool now has additional addendum surface options in the Control Panel:
 - **Surface creation method:** Choose from **Loft** or **Sweep**.
 - **Swap Loft inputs:** Quickly interchange the profiles and rails to get a preferred shape.
- The **Matching Die** tool now has a new guide bar option, **Radius multiplier**, which allows you to set a different offset multiplier for the fillet radius.

Resolved Issues

- Improved the Addendum Bridge tool to maintain tangent continuity between the bridge surface and the rib's adjacent surface.

Learn More About Inspire Studio

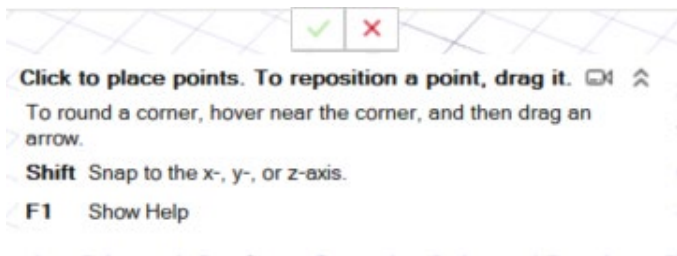

You can learn more about new and existing features in Inspire Studio using the following resources:

In-Application User Assistance

Workflow help appears when you select a tool that opens a guide bar or microdialog. The text prompts you what to do next.

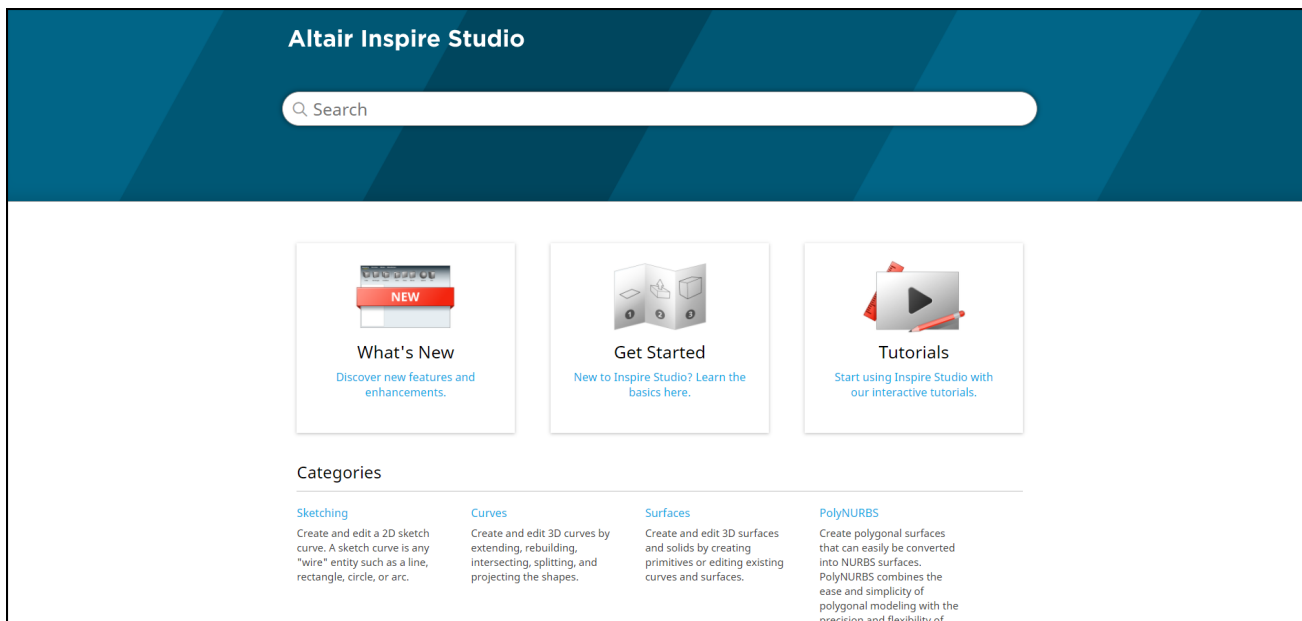

Click to view additional tips and shortcuts. Some tools also include a video .

Online and Offline Help

Press **F1** or select **File > Help > Help** to view the online help.

You can download an offline version by selecting **File > Help > Download Offline Help**. An internet connection is required to download.
